Comfort deviation

Saving Potential

Unique visualization of energy savings

ComfortID.org assesses your thermal comfort expectations. This enables a comparison between your comfort temperature and the interior one.

Rule of thumb:

When heating

Temperature *hotter than* comfort temperature: saving potential
Temperature *colder than* comfort temperature: realized savings

When cooling

Temperature *hotter than* comfort temperature: realized savings
Temperature *colder than* comfort temperature: saving potential

Upcoming features Your opinion matters!

The Rating Page is currently undergoing an overhaul. In the next version, the selection of mitigation alternatives will be simplified. You will have easy access to boosting you conditioner and ecological alternatives.

Stay tuned and don't forget to give us your feedback to increase your chances to win the [International Award](#) for the best app improver!
